Facilities Management has replaced its Integrated Workplace Management System, FAMIS, with a new system called AiM. AiM provides a modern interface, better reporting features, and mobile apps for direct access in the field. It allows for integration when working with work orders, inventory, key control, preventive maintenance, logistics, and project management.

New AiM Partner
Spur Campus which is located on the grounds of the historical “National Western Stock Show” will also be joining as a Partner in AiM. They will be fully utilizing AIM to track, time, material and assets for the new Vida, Terra and Hydro buildings. They are geared towards public education, community outreach and research. Go live for this Partner is tentative as not all buildings are currently on-line.

Let’s welcome all of our new partner!!

CPPM
The most recent module implemented was CPPM (Capital Planning and Project Management). This will bring FM’s Design and Construction Team into AiM. The first capital construction project was entered into AiM in January.

Upgrade to 12.1
AiM is getting a new look! On February 3rd AiM was upgraded to 12.1. The biggest change this upgrade brings is to the user interface and the work desk. Though this change may not be fully apparent now, it will be in the next 6 months. The 12.1 upgrade allows for a switch to be flipped between the old work desk and the new work desk. Right now we are still seeing the old work desk, however training will be provided for the new work desk and once users become comfortable the switch will be flipped!

Keys
The Key Module went live in February 2022. Now that the import is done, the Key Desk will continue to enter keys that were assigned during the conversion process. Computer Services continues to work with the Key Desk, and when fully complete, more than 30,000 keys will be entered into AiM.

ANA
AssetWorks’ Assessment and Needs Analysis (ANA) module integrates with AiM’s Operations & Maintenance and its CPPM modules. ANA provides record tracking for recurring asset renewals, non-recurring deficiencies, and multi-year plans focused on strategic goals. This module is in the early research and development stage.

AiM Champions
As FM moves forward implementing new features and upgrading, you can always contact an AiM expert. These FM individuals in various positions, have become proficient in using AiM. If you have questions about how to use AiM, contact one of the AiM Champions below:

**Work Control/Key Desk:**
Lori Barker, Christina Miller, Amy Ouska

**Computer Services:**
Shelby White

**Trades:**
Roger Sanchez, Ray Guzman, Brian Baltazar

**Finance:**
Monica Roth

**Utility Services:**
Ken Vergo

**RCS:**
Kim Pearsons, Leland Owen

**Assets:**
Jackie Robledo

**Design and Construction:**
Tracey Abel

**Logistics:**
Gwen Cooper
