Agastache 'Blue Boa'		Giant hyssop	2-3'	1-1.5'	Sun, Part Sun	Medium	June - September	Violet Blue	Upright	
Penstemon x mexicali 'Psmyers'		Shadow Mountain penstemon	18-24"	14-18"	Sun, Part Sun	Moderate to dry	May to September	Lavender	Upright	
Asclepias Speciosa		Showy Milkweed	2-4'	2-3'	Sun, Part Sun	Moderate to dry	Summer - Fall	Pink, Purple	Clusters, upright	
Fall Bloom		Berlandiera lyrata	Chocolate Flower	12-20"	12-20"	Sun		June to frost	Yellow	Spreading/Sprawling
	Eriogonum wrightii var. wrightii	Snow Mesa buckwheat	18-20"	18-24"	Sun		August - Novemer	White	Reseeding	
	Oenothera macrocarpa subsp. Incana	Silver Blade evening primrose	4-8"	16-24"	Sun	Moderate to xeric	May - Frost	Yellow	Spreading	
	Agastache 'Pstessene'	Coronado Red hyssop	18"	12"	Sun, Part Sun	Moderate to dry	Midsummer-Frost	Red		
	Crocus speciosus	Fall- Blooming Crocus	6-12"		Sun, Part Sun	Moderate	Sept-October	Lilac	Naturalizing	
	Chrysothamnus nauseosus vqar. Nauseosus	Baby Blue Dwarf Rabbitbrush	16-24"	20-30"	Full Sun	Low	Summer - Late Fall	Yellow	Shrub	
	Rudbeckia x 'Denver Daisy'	Denver Daisy Black-Eyed Susan	18-24"	18-24"	Full Sun	Medium	Mid to late Summer	Yellow	Naturalizing	
	Origanum libanoticum	Hopflower oregano	10-24"	18-24"	Sun, Part Sun	Moderate to dry	Summer to late fall	Lavender	trailing	

Notes

Evergreen shrub, best when planted on slope with good drainage, prefers afternoon shade, slow to est. needs room to grow
Thrives in hot, dry conditions. Compact Habit. Protect with extra mulch and cut to ground each spring for best performance.
Long blooming. Mounding. Bees frequent bell shaped blossoms.

Tough wildflower.

Early spring! Turns orange-red in winter. Can reseed- deadhead to avoid, results in stronger plant.

Groundcover, durable, give plenty of sun and avoid excess water.

Needs extra protection from the sun - especially in winter months. Avoid bark mulch.

Can reseed heavily, seedlings are located at the base of the parent plant (will reflower 3rd spring), Low maintenance.

CO Native shrub, naturally occurring in front range. Arching, vase shape, thornless branches. Birds like the fruit.

Long blooming, low growing, spreading. Flowers more abundant in full sun.

Dwarf lavender with compact heads, good for small spaces. Mature size in 2-3 growing seasons.

Yellow flowers turn orange as they age. Green foliage changes to vivid purple-red in winter. Requires little attention.

Situate in Full sun for optimal flower bloom.

Compact Shrub. Early summertime pruning for previous seasons flowerbuds.

Rapidly spreading groundcover. Grows best in full sun. Aerate surrounding soil to help promote spread.

Sweet fragrance

Reeseeds. Can be invasive. Highly attractive to butterflies.

Showy flowers, in large terminal spikes. Attractive to bees, hummingbirds, and butterflies.

All season blooms. Requires deadheading for prolonged blooming.

Seeding can be an issue.

Needs good drainage, minimal water. Chocolate scent early in the morning. Avoid too much OM.

Good companion for rabbitbrush, sage, hyssop. Dry to xeric.

Well drained soil. Plant away from sidewalks/edges so it has room to grow.

Best in Sunny localton. K.van Bourgondien and sons

Can tolerate more water. Longer flowering season. Attracts butterflies. Winter interest.

Long Bloom Season. Colorado Staple.

Vigorous growth. Deadhead spent flowers.
