GIS PLANNING SPECIALIST

The FM Campus Planning section would like to introduce Lyle Church who started on Monday, 8/14, as the new GIS Planning Specialist.

Originally from Colorado, Lyle spent the last three and a half years in North Carolina—and he is excited to return to Colorado. He joins FM with five years of GIS experience shared between local government and the private sector, primarily in utilities, real estate, and creating routing solutions using GIS.

In his new position, he will provide professional mapping system services and information management for the planning and analysis of the University's assets. He will be responsible for the maintenance, development, and support of the University's geodatabase (field data collection, mapping, and reporting needs) inclusive of the outward facing maps like the CSU interactive map. Lyle will also be coordinating with stakeholders across FM and the community as needed.

Lyle is an avid football fan, enjoys *The Office* TV show, and has been fortunate to travel to parts of Iceland, Germany, and Italy. Please welcome Lyle to Facilities Management.
