# FACILITIES MANAGEMENT

AT COLORADO STATE UNIVERSITY

FM WEEKLY  
COMMUNICATION

Issue 83

## Welcome FM New Hires (October 2020)

**Sean Flowerday** is the new Utilities Accountant for FM, working within the FM Finance section. About his new position, he says, “I plan on helping the university any way I can.” He enjoys sports and is passionate about physical fitness. He has run two “Tough Mudders” and he is into powerlifting. But, in his own words, he’s “still super nerdy.” He loves strategy games – chess, in particular.

Sean received his degree in Finance and Sport Management from Miami University (Ohio). He recently moved to Fort Collins from Michigan and spent the majority of the last six years working in minor league baseball. Most recently, he was the Vice President of Finance & Accounting for the United Shore Professional Baseball League. Still very new to the area, he asks that you say “hi” if you see him in the office. He is looking forward to meeting and working with everyone.

**Thompson Tindall** is the new welder for the plumbing shop, working within Trades for the FM Operations section. Thompson says he’s, “Glad to join the CSU Team!” He’s a third-generation welder, and actually learned to weld when he was 13 years old. He has been welding for over 30 years! In this position, he will be responding to the majority of welding needs at CSU. He is most excited about collaborating with different teams on projects that will make things better for the CSU community.

Thompson received his degree in studio art from the University of South Carolina. In his words, “Art is the first form of communication.” Most recently, he taught at Front Range Community College for six years, and was the program director for the welding department for the last four of those. Thompson is a Navy veteran and the founder of a veteran’s program called [War Eagle Garage](#), which works to improve the lives of veterans through a Motorsports program. Interestingly, he used to work in NASCAR building racecars. Thompson currently lives in Fort Collins with his wife and has two grown children. A fun fact about his first name is that his mother named him after a great great grandfather who helped with the engineering of the Big Thompson Canyon.
